Profile

Vibrant professional with practical software development experience, eager to learn continuously and quick to grasp new technologies. Thrive in dynamic, fast-paced environments and motivated to contribute to building high-quality software solutions.

Experience

Software Development Engineer in Test - Intern Aug 2024 – present
CloudAssert Technologies  Coimbatore, India
1 year

Junior Frontend Developer Jun 2023 – Oct 2023
Emglitz Technologies  Coimbatore, India
5 months

Education

M.Sc Software Systems (5 years integrated) 2020 – 2025
Kongu Engineering College  Perundurai, India
CGPA - 7.82/10

HSC (Higher Education): Tamil Nadu State Board 2020
Vivekananda Vidyalaya Matriculation Higher Secondary School Muthur, India
Aggregate - 68.5%

SSLC (Secondary Education) : Tamil Nadu State Board 2018
Vivekananda Vidyalaya Matriculation Higher Secondary School Muthur, India
Aggregate - 89.4%

Technical Skills

Java | C# | MySQL | Javascript | TestCafe | Typescript | Python | Postman | PHP | Selenium

Projects

Weaver Book

- A web app built to streamline inventory management and improve coordination with vendors in the weaving sector.

Technologies Used: PHP, MySQL

Highlights: Automated inventory and vendor sync reduced manual errors by 60% and improved order accuracy.

Car Renovation Spa

- A full-stack platform for booking car services, tracking renovation progress, and enabling direct customer interaction.

Technologies Used: React.js, Node.js, MongoDB

Highlights: Implemented real-time progress tracking and automated status updates to enhance customer engagement.

Expense Tracker

- Helps users monitor daily expenses, categorize spending, and manage budgets efficiently.

Technologies Used: React.js, Node.js, MongoDB

Highlights: Enhanced performance using MongoDB aggregation and introduced responsive chart-based analytics.

Maruti Opticals

- An E-Commerce platform tailored for optical businesses, supporting product listings and customer orders.

Technologies Used: HTML, CSS, JavaScript, MySQL

Highlights: Built advanced product filters and optimized queries for fast product search and checkout.

Digital Notice Board

- A smart notice board system enabling real-time updates using a Raspberry Pi setup.

Technologies Used: Raspberry Pi

Highlights: Developed a web-based interface to remotely control and schedule announcements.

Rain Detector and Flood Controller

- Built a system to detect rainfall and control flood risks using sensors and automated logic.

Technologies Used: Arduino Uno

Highlights: Deployed water level sensors and relay-based control to trigger preventive flood responses.

Research Project

Advancing Forex Prediction with Transformer Based Deep Learning Models

Presented at IEEE Conference (CIFEr)

Implemented and compared GRU, Informer, and TFT for forecasting forex rates. TFT outperformed others and highest simulated trading profit, showcasing its effectiveness in short-term forex prediction.

Certificates

Azure Data Scientist Associate

Intermediate

Area of Interests

Software Development | Full Stack Development
